

TERMS AND CONDITIONS

Last Updated: July 3, 2026

Please read these Terms and Conditions ("Terms") carefully before using the GScreenshot application ("Application"). These Terms constitute a legally binding agreement between you ("User" or "you") and the developer of GScreenshot ("Developer", "we", or "us") regarding your use of the Application downloaded via the Apple App Store or obtained for other operating systems. By installing, accessing, or using the Application, you agree to be bound by these Terms. If you do not agree to these Terms, do not install or use the Application.

LEGAL SUMMARY & QUICK REFERENCE

Parameter	Applicable Terms
Application Architecture	GScreenshot (Cross-platform Electron-based framework)
Supported Operating Systems	macOS (including App Store distribution), Windows, and standalone environments
Licensing & Warranty Model	Strictly provided on an "AS IS" and "AS AVAILABLE" basis
Official Support Channels	Accessible via the official Application interface ("About" section) and official GitHub Pages website

1. GENERAL PROVISIONS & CROSS-PLATFORM DISTRIBUTION

1.1. Acceptance of Terms

This document is a legally binding agreement between the User and the Developer. By installing, running, updating, or utilizing the Application on any operating system, you fully and unconditionally accept these Terms. If you do not agree, you must immediately cease all use and delete all copies of the Application from your devices.

1.2. Cross-Platform Framework (Electron Framework Notice)

The User explicitly acknowledges and agrees that the Application is developed utilizing the Electron cross-platform framework. Due to the inherent technical nature of Electron-based software, the Application relies heavily on integrated web technologies and runtime environments. The Developer provides no warranty regarding individual performance variations, memory allocation traits, framework-specific background tasks, or cross-platform operational differences that may arise between various host environments, including but not limited to macOS and Windows ecosystems.

1.3. Distribution Platform Regulations

- **Apple App Store Builds:** For builds distributed through the Apple App Store, these Terms supplement the standard Apple Licensed Application End User License Agreement (EULA). In case of any technical or legal conflict, the Apple Standard EULA shall govern solely regarding the user's operational relationship with Apple.

- **Windows & Standalone Builds:** For versions downloaded outside the App Store (e.g., standalone Windows or macOS packages), these Terms represent the exclusive and complete agreement governing the licensing, utilization, and liability limitations of the software.

2. CORE PURPOSE & DATA PROCESSING ARCHITECTURE

2.1. Local Automation Tool

GScreenshot is built exclusively as a local automation tool designed for capturing screen areas, cropping images, and making basic visual modifications. The integrated toolkit provides functional items specifically optimized for graphic highlighting, such as distinct underline paths, local text annotations, and other operational interface indicators.

2.2. Isolated Volatile Memory Processing

All capturing, editing, rendering, and processing operations occur strictly within the isolated volatile memory (RAM) and local execution directories of the User's device. The Developer does not maintain, control, operate, or deploy any intermediary servers, proxy infrastructures, or backend cloud storage to intercept, log, view, or process your graphics.

3. THIRD-PARTY SERVICES & CLOUD CONNECTIONS

3.1. Google Drive Account Connection

The Application contains optional capabilities that permit the User to connect a personal Google Drive storage account for uploading captured files. The User explicitly acknowledges that this connection is performed strictly in a peer-to-peer manner directly between the local client on the User's machine and the official Google API servers.

3.2. Total Exclusion of Cloud Liability

The Developer is not an intermediary, partner, or agent of Google. The Developer assumes absolutely zero liability for:

- Disconnections, token expirations, API quota blocks, or transmission throttling applied by Google;
- Data corruption, folder synchronization failures, account suspension, or storage losses occurring on Google infrastructure;
- Security breaches or unauthorized access affecting the User's personal Google account.

4. TOTAL EXCLUSION OF LIABILITY FOR USER CONTENT & DISTRIBUTION

4.1. Ultimate Content Indemnification

CRITICAL NOTICE: The Developer exerts zero control, monitoring, oversight, validation, or screening over what the User captures using the Application. The User bears sole, ultimate, and exclusive legal and financial responsibility for all screenshots, text, data, and visual captures created via the software.

4.2. Sensitive and Protected Data Types

The User completely indemnifies and releases the Developer from any liability, claims, regulatory fines, or damages if the Application is used to capture:

- **Highly Sensitive Personal Data:** Medical records, private chats, biometric data, or private communication of third parties;
- **Financial Data:** Credit card details, bank account numbers, passwords, cryptographic keys, authentication parameters, or corporate commercial secrets;
- **Protected Property:** Copyrighted digital content, live streams, media packages, or any information protected under non-disclosure agreements (NDAs) or intellectual property statutes.

4.3. Absolute Freedom of Transmission Liability

The Application provides technical tools for local storage or cloud export execution upon the User's explicit demand. The Developer is completely and absolutely not responsible for where, to whom, or how the User transmits, sends, shares, exports, uploads, or publishes the captured screen items. Whether the User transmits graphics to external messengers, public forums, corporate channels, or cloud nodes, all transmission operations are executed solely at the User's absolute discretion and at their own independent legal risk.

5. ABSOLUTE WARRANTY DISCLAIMER: "AS IS" AND "AS AVAILABLE"

5.1. Maximum Legal Disclaimer

To the maximum extent permitted by applicable local laws, the Application and all its updates, upgrades, incremental revisions, patches, and modifications are provided strictly on an "AS IS" and "AS AVAILABLE" basis, without warranties, representations, or conditions of any kind, either express, implied, or statutory.

5.2. Technical Failures, Glitches, and Bugs

The Developer explicitly disclaims all liability for any technical failures, runtime crashes, memory leaks, compilation bugs, system freezes, UI glitches, operating system incompatibilities, or unexpected software terminations. The User recognizes that complex software environments, especially those deploying cross-platform runtimes (Electron), are subject to technical anomalies, and accepts this risk fully upon installation.

5.3. Complete Data Loss Exclusion

The Developer shall have zero responsibility or legal liability for the corruption, temporary unavailability, irreversible deletion, or total loss of any configuration profiles, custom hotkey combinations, locally stored imagery, annotation layouts, or transmission history caused by operational crashes of the Application, device failures, OS updates, or framework runtime malfunctions.

6. LIMITATION OF LIABILITY

In no event and under no legal theory (whether in contract, tort, negligence, or strict product liability) shall the Developer be liable to the User or any third party for any direct, indirect, incidental, special, exemplary, punitive, or consequential damages of any character whatsoever. This includes, without limitation, damages for loss of goodwill, work stoppage, computer failure, data compromise, security leaks initiated by user actions, commercial loss, or loss of profits arising out of the use, abuse, or inability to use the Application, even if the Developer was advised of the possibility of such damages.

7. INTELLECTUAL PROPERTY & THIRD-PARTY LINKS

7.1. Ownership Protection

The Application, its unique logic, UI configuration layouts, brand elements, asset builds, compilation packages, and underlying structural framework properties are the exclusive intellectual property of the Developer. Modifying, reverse-engineering, decompiling, extracting source manifests, or redistributing the binaries without explicit written authorization is strictly prohibited.

7.2. Community Interaction Links

The Application incorporates informational options connecting users to external infrastructure, specifically the official Telegram channel resource. These platforms are governed by distinct independent regulations. The Developer holds no administrative control and rejects all responsibility for the external privacy mechanics, access conditions, or active content hosted on third-party communication networks.

8. AMENDMENTS AND REVISIONS

The Developer holds the unilateral right to revise, modify, rewrite, or update these Terms and Conditions at any moment to reflect changes in Electron infrastructure, platform distribution rules across Windows or macOS ecosystems, or applicable digital legislations. The ongoing utilization of the software following the publication of any upgraded terms implies absolute and total legal consent to the modified rules.

9. CONTACT SPECIFICATIONS & SUPPORT NODES

For official support processing, compliance validations, legal notices, or interface inquiries regarding these Terms and Conditions, the User must utilize the official communication endpoints (including the dedicated support email and the official Telegram channel) accessible directly within the Application's interface (under the "About" section) or published on the official Application website hosted via GitHub Pages.
